

REMARKS

Amendments to the Drawings

In **Figure 3**, the **attachment zones 251a** and **251b** were previously shown as having “zero” thickness. Their depiction has been clarified by showing these elements as having a visible thickness.

In **Figure 3** and **Figure 6**, the reference numeral **22** has been deleted because this reference numeral is not used in the subject Application.

In **Figure 3**, **Figure 4**, **Figure 5**, and **Figure 6**, the **left side edge 237a** and the **right side edge 237b** of the **absorbent assembly 200** have been identified by their respective reference numerals in order to facilitate reference to this figure. Support for these changes is found on page 5 in the paragraph beginning at line 4 of the specification as originally filed as well as in the other figures.

In **Figure 9**, the portion of the **front waist edge** that is visible in the left hand portion of the figure was previously inadvertently erroneously identified by the reference numeral **138**. This reference numeral has been changed to **136** to correctly identify this portion of the **front waist edge**.

It is respectfully presumed that these changes will be accepted and so replacement drawing sheets **3/10** and **4/10** incorporating the changes are attached to facilitate their immediate entry into the file.

Respectfully submitted,

By: Michael P. Hayden
